

# The Pain of Needles Has Met Its Match!

## ADT Lidocaine 4% Topical Anesthetic Serum

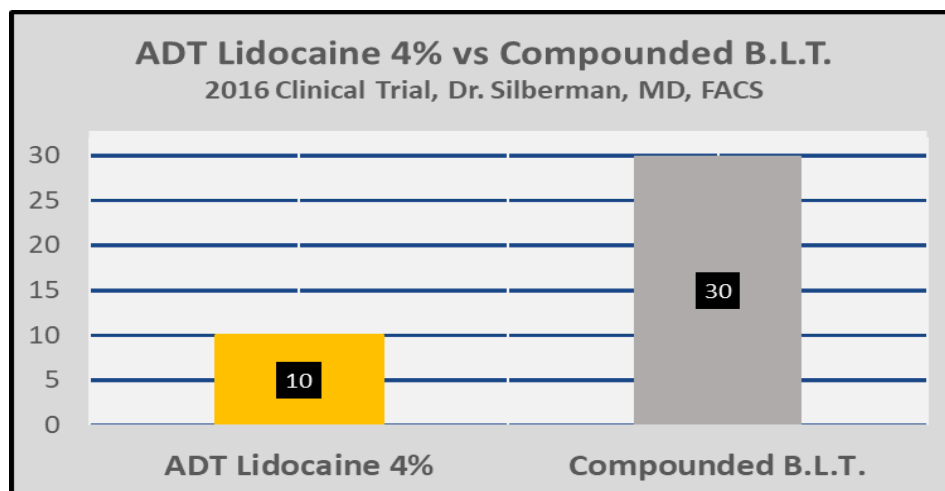

ADT Lidocaine 4% serum is a simple, effective and rapid solution to reduce or eliminate pain, discomfort and anxiety associated with a variety of aesthetic procedures. **ADT Lidocaine 4% has a proprietary delivery technology that uses micro-emulsion for rapid absorption and desensitization.**

### BENEFITS

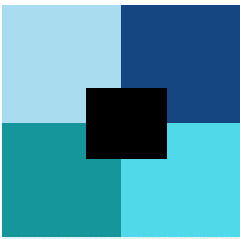

Effective numbing in as **fast as 10 minutes**.

Easy application and effective, rapid absorption.

Eliminates the need for removing before treatment.

\*Average time (minutes) of desensitization across 25 patients.

# ADT Lidocaine 4%

## Topical Anesthetic Serum

### Clinical Testimonials

*"I have a busy aesthetic practice and treat hundreds of patients a week. A large number of those patients require some type of injections and/or micro-needling. Many patients experience pain with these procedures and actually become very anxious prior to the injection. Although we have used several numbing agents including BLT, there is still an element of pain experienced. Once we started using ADT Lidocaine 4% as a numbing prep, our patients are much happier and no longer have anxiety. They experience virtually no pain, even when doing lip fillers. I can typically perform the injection 10 minutes after applying the ADT Lidocaine 4% as opposed to waiting as long as 30 minutes like I used to with other products".*

**Dr. Richard Goldfarb, Langhorne, PA**

*"I am a full-time aesthetician at a busy practice and see numerous patients a day for procedures including micro-needling and laser treatments. I have been using ADT Lidocaine 4% for several months as a pre-treatment numbing agent and having great success. The patients not only experience little or no pain, the level of patient comfort is much higher. This has caused an increase in patients referring their friends to me since they tell them the procedures "don't hurt anymore".*

**Diane P, Aesthetician, Langhorne, PA**
